

**Care Compare Five-Star Ratings of Nursing Homes
Provider Rating Report for June 2021**

Ratings for Whittier Hospital Medical Ctr D/P SNF (555589) Whittier, California				
Overall Quality	Health Inspection	Quality Measures	Staffing	RN Staffing
★★★★★	★★★★	★★★★★	★★★	★★

The Five-Star ratings provided above will be displayed for your nursing home on the Care Compare website on or around June 23, 2021. The health inspection rating incorporates data reported through May 31, 2021. The time periods for each of the quality measures that contribute to the Quality Measure (QM) rating can be found in the QM tables located later in this report. The staffing and RN staffing ratings are based on payroll-based journal (PBJ) staffing data reported for the fourth calendar quarter of 2020.

Helpline

The Five-Star Helpline will operate Monday - Friday **June 21 - 25, 2021**. Hours of operation will be from 9 am - 5 pm ET, 8 am - 4 pm CT, 7 am - 3 pm MT, and 6 am - 2 pm PT. The Helpline number is 1-800-839-9290. The Helpline will be available again **July 26 - 30, 2021**. During other times, direct inquiries to BetterCare@cms.hhs.gov as Helpline staff help respond to e-mail inquiries when the telephone Helpline is not operational.

Important News

Quality Measures (QMs)

With the April 2021 refresh the QM data returned to the previous update schedule (prior to the COVID-19 Public Health Emergency). The MDS-based QMs use data from Q1, Q2, Q3, and Q4 of 2020. Four of the claims-based QMs use data based on the data collection period ending September 30, 2020. The two QMs that are part of the Skilled Nursing Facility Quality Reporting Program (SNF QRP), "Percentage of SNF residents with pressure ulcers/pressure injuries that are new or worsened" and "Rate of successful return to home and community from a SNF," will continue to be held constant at this time.

Important News (continued)

Staffing

The PBJ data for 2021 Calendar Quarter 1 (January - March 2021) submitted by the May 15, 2021 deadline will be reported on Care Compare and used to calculate the staffing ratings beginning with the July 2021 refresh. A preview of these data for your facility are included in this report.

Health Inspections

The Five-Star health inspection rating listed on the first page of this report is based on three cycles of survey data and three years of complaint and focused infection control inspections and incorporates data reported through May 31, 2021.

Your Health Inspection Rating

Provided below are the survey dates included in the calculation of the health inspection rating for your facility. The dates listed include standard survey dates as well as dates of complaint inspections and focused infection control inspections that resulted in deficiencies. For more detailed information about the deficiencies cited on each survey, please visit: <https://data.cms.gov/provider-data/>. This website updates on the same day as the Care Compare website. Any additional revisit points can be found in the 'Provider Information' table at the link provided above.

³The observed rate is the actual rate observed for the facility without any risk-adjustment; the expected rate is the rate that would be expected for the facility given the risk-adjustment profile of the facility; and the risk-adjusted rate is adjusted for the expected rate of the outcome and is calculated as (observed rate for facility / expected rate for facility) * US observed rate. Only the risk-adjusted rate will appear on Care Compare.

²This measure includes some imputed data because there are fewer than 20 resident assessments or stays across the four quarters. This value is used in calculating the QM points and used in the QM rating calculation but will not be displayed on Care Compare.

³The observed rate is the actual rate observed for the facility without any risk-adjustment; the expected rate is the rate that would be expected for the facility given the risk-adjustment profile of the facility. For successful community discharge, the risk-adjusted rate is calculated as (predicted rate / expected rate) * US Observed rate and is referred to as the risk-standardized rate. For rehospitalization and emergency department visits, the risk-adjusted rate is calculated as (observed rate / expected rate) * US observed rate. Only the risk-adjusted or risk-standardized rate will appear on Care Compare.

⁴For this measure, this value is the National Benchmark, rather than the national average of the risk-adjusted rate.

NR = Not Reported. The expected rate is not reported for this measure.

Unadjusted Short-Stay Quality Measure Score	NA
Total Short-Stay Quality Measure Score (unadjusted short-stay QM score*1150/800) ¹	NA
Short-Stay Quality Measure Star Rating	Not Available
Total Quality Measure Score ²	NA
Overall Quality Measure Star Rating	★★★★★

¹An adjustment factor of 1150/800 is applied to the unadjusted total short-stay score to allow the long- and short-stay QMs to count equally in the total QM score.

²The total quality measure score is the sum of the total long-stay score and the total short-stay score. If a provider has only a long-stay score or only a short-stay score, then no total score is calculated and their overall QM rating is the same as the long-stay or short-stay QM rating, depending on which is available.

Additional Notes Regarding the Quality Measure Tables

"d<20". For individual quarters for the MDS-based QMs, d<20 means the denominator for the measure (the number of eligible resident assessments) is too small to report. A four quarter average may be displayed if there are at least 20 eligible resident assessments summed across the four quarters.

"NA". "NA" will be reported for quality measures not included in the QM Rating: 1) for which data are not available or 2) for which the total number of eligible resident assessments summed across the four quarters is less than 20.

SNF Quality Reporting Program (QRP) Measures:

Two of the short-stay QMs used in the Five-Star QM rating calculation are SNF QRP measures: "Percentage of SNF residents with pressure ulcers/pressure injuries that are new or worsened" and "Rate of successful return to home and community from a SNF." There are additional SNF QRP measures that are not included in the Five-Star ratings but are displayed on Care Compare. Information about these measures can be found on separate provider preview reports in the QIES mailbox. Please watch for communication from CMS on the availability of these reports. Additional information about the SNF QRP measures can be found in the Quality of Resident Care section on the References page of this report.

Staffing Information

Summary of Reported Staffing for January 1 to March 31, 2021

The data listed below include the reported staffing for your facility and state, and for the US, using the PBJ data for **January 1 to March 31, 2021** (submitted and accepted by the **May 15, 2021** deadline) and the average MDS-based resident census for your facility and state, and for the US. ***These data will be reported on Care Compare for three months, starting with the July 2021 update to the website, and will also be used for determining staffing ratings during that time.***

Availability of Reported Staffing Data

Some providers will see 'Not Available' for the reported hours per resident per day in the table above and a staffing rating may not be displayed for these facilities for **July through September 2021**. There are several reasons this could occur:

1. No MDS census data were available for the facility.
2. No on-time PBJ staffing data were submitted for the facility.
3. *Criterion no longer used.*
4. The total reported staffing HRD were excessively low (<1.5 HRD).
5. The total reported staffing HRD were excessively high (>12.0 HRD).
6. The total reported nurse aide HRD were excessively high (>5.25 HRD).
7. A CMS audit identified significant discrepancies between the hours reported and the hours verified, or the nursing home failed to respond to an audit request.
8. Other reason.

PBJ staffing data report

The following table summarizes the information that your facility reported for nurse staffing only (PBJ Job codes 5-10 and 12) as listed in the PBJ staffing summary on the next page for **January 1 to March 31, 2021**. We believe these are indicators of the completeness of the data submitted by your facility and the plausibility of the values reported. Indicators 1 and 2 show whether or not a facility has reported nurse staffing information for each day in the quarter. If a facility did not report hours for nursing staff for each day, we believe that may indicate that the facility has not submitted complete data.

For days that no nursing or RN staff hours were reported (indicators 1 and 2), we have included a list of those dates in listings 1 and 2, located at the end of this report.

Indicator	Description	Number
1	Number of days in quarter (out of 90) on which your facility reported no nursing hours (i.e. no aide ¹ , LPN, or RN) but on which there were residents in the facility	0
2	Number of days in quarter (out of 90) on which your facility reported no Registered Nurse (RN) ² hours but on which there were residents in the facility	0

¹Includes the following job codes: Certified nurse aide (job code 10) and medication aide/technician (job code 12). Aides in training are not included.

²Includes the following job codes: RN Director of Nursing (5), RN with administrative duties (6), and RN (7).

PBJ nurse and physical therapist staffing summary for January 1 to March 31, 2021

The following table summarizes the nurse and physical staffing data that your facility reported to the PBJ system for the quarter. The data include both exempt and non-exempt employees, as well as agency staff. Please note that values for hours are rounded to the nearest integer. As with the other information, facilities should review this information to ensure they are reporting complete and accurate data for future submissions.
